

# FLOE Canopy Systems - for those with high expectations

## 7 reasons why FLOE canopy systems offer you more for your money

- Greater boat protection. With FLOE's extra deep fabric and framework, your canopy will not blow in or up
- Classy canopy style with tailor-fit fabric for a refined look
- Fabric is held taut with FLOE's exclusive Quick-Clip™ fabric attachment system
- FLOE uses premium-grade solution dyed fabric. It has a more luxurious look and weighs 50% less than comparable vinyl fabrics
- SDP fabric is urethane coated, UV protected and has rip-resistant technology. Available in green, khaki, grey, burgundy and blue
- Many canopy sizes are available to accommodate a variety of watercraft lengths
- Canopy frames adjust vertically and horizontally for perfect boat coverage

**Quick-Clips™**

**Elastic Tension-Belt™**

## Quick-Clip™ fabric attachment and Elastic Tension-Belt™ system

- FLOE's innovative Quick-Clip™ system with ergonomic finger grips allows you to install and remove your canopy fabric in half the time of other systems
- The exclusive Elastic Tension-Belt™ design provides constant tension on the fabric for a taut look and stunning aesthetics

## Horizontal Fabric Tensioner

Adjustable end pulls fabric taut horizontally and retracts for easy fabric removal.

# Canopy Extensions - extend the deepest canopy on the market

## Standard Colors

## Optional Colors

Additional Side Protection - For those who require more coverage and protection, FLOE offers a canopy extension kit. Canopy extension kits add an additional 18" of side coverage to FLOE's already extra deep canopies. These kits are available in all of our popular SDP fabric colors. Canopy extensions require that the lift be anchored.

Canopy extensions are a great solution for watercraft with:

- Wakeboard towers
- Bimini tops
- Full enclosures
- Deep hulls such as cruisers

Canopy extensions use sturdy, fully adjustable aluminum frames that bolt to the bottom of the main canopy rails to support the extra fabric.

FLOE's canopy extensions give you extra clearance so you can bring boats with wakeboard towers and pontoons with covers into your lift without having to fold anything down.
