

Canopies

Protect your investment from the top down

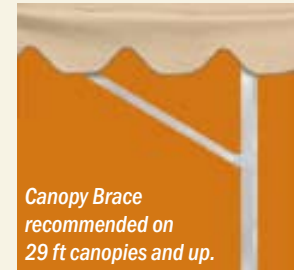

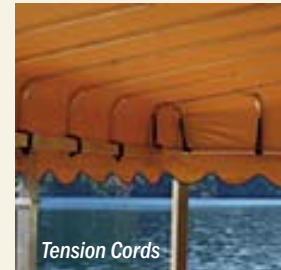

Constant exposure to sun, wind and driving rain can ruin your watercraft from the inside out. Cracking, fading and peeling not only takes away from the look, comfort and function of your boat, it reduces the value of your investment. Hewitt's custom designed aluminum framed canopies are the perfect way to "top-off" the safety provided by your Hewitt Lift. Available in a variety of great colors, our nylon reinforced vinyl canopies provide years of beautiful maintenance-free protection. They're built in many sizes and can be designed for other applications as well, including carports, boat slip covers and rail system covers. If you have a special canopy need just give us a call.

Standard Features

- Canopy frame with crossbows positioned every two feet.
- Canopy is solidly mounted on telescoping 3" x 3" side support tubes.
- Quick-release center support straps keep vinyl from billowing in the wind.
- Heat welded seams prevent thread rot and water infiltration.
- Tension cords keep vinyl covering taut and simplify installation and removal.

Optional Under-Canopy Storage Net

Make the most of available space. This convenient storage net easily attaches to the canopy frame, providing quick access to supplies and recreational gear. Weight capacity approximately 75 lbs.

Frame Crossbows (Shown with optional storage net)

Canopies

Functionality and great appearance

Free Standing Canopy

Rail System & Narrow Pontoon Canopy

Canopy frames are typically attached directly to the lift, but can be independent. The pictures shown at far right - top, are examples of stand-alone frames for your pontoon with legs. If you're looking for something special, Hewitt offers two additional canopy styles that are both distinctive and functional.

Tower Canopy

The arched canopy (shown at far right) provides greater vertical clearance, allowing boat towers to remain in the upright position for storage.

Peak Roof Canopy

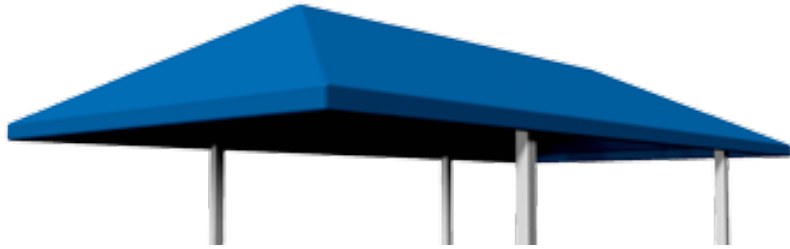

The steep pitch of a Peak Roof Canopy (shown at right) rapidly sheds water. Its higher profile and clean lines accentuate the color of your canopy.

Optional Cover Fabric

Hewitt Canopies may be ordered with fade-resistant SeaMark fabric. SeaMark is the #1 marine fabric in the world. It is a premium, woven material that will not trap heat and moisture. SeaMark also offers an almost unlimited selection of colors, making it possible to perfectly match or accent the colors of your boat.
