

### Full-Length Vinyl V-Bunk & Motorstop

The V-Bunk features an aluminum channel and extruded vinyl. The aluminum brackets and channel allow you to make simple adjustments and conform the V-Bunk to any boat hull shape. Pier Pleasure's standard mounting brackets have the necessary clearance needed for the in-board shaft on ski boats. The end of Pier Pleasure's V-Bunk is curved to reduce wear points and protect the hull of your boat.

With a motorstop installed on your boat lift, you can safely position your boat with ease. Extruded vinyl is installed to protect the lower unit of your motor.

### Full-Length Vinyl Guide-Ons

These guide-ons are made from aluminum channel and covered with extruded vinyl. Flared ends allow for easier entrance into the boat lift. They are adjustable both vertically and horizontally.

### Lift Jack

The lift jack is a great helping hand when making adjustments to the lift legs or when installing wheels for installation and removal of your boat lift.

Rubber

Plastic

### Wheel Kits

Using wheels when installing and removing a boat lift will make the job easier in most situations. Bracket kits are available to install on any additional lifts and use the same wheels. The plastic wheels may be left on after installation or removed if shallow water conditions require. Lift legs must be lowered into position after installation. The wheels are not intended to provide support while the boat is on the lift.

### Flared Pontoon Guide-Ons

Flared Pontoon Guide-Ons will give you confidence to drive your boat onto the lift with ease. Simply line up the front of the pontoon and the guide will keep you straight as you drive onto the boat lift. The low-profile design of the guides allow you to easily enter the pontoon without any interference.

### Shore Commander

Shore Commander boat lift drive system features industry leading direct drive technology, wireless remote convenience and dock lighting for safety. Because of the many great features found in this system, Pier Pleasure has teamed up with Commander Products to distribute the Shore Commander Direct Drive. Pier Pleasure truly believes that this direct drive system is well tested, very reliable and will make a great accessory on any lift.

Remote

### Centering Guides

Centering Guides provide a simple way of positioning your boat and prevent damage to the boat's exterior. The centering guides are constructed with vinyl tubing that rotates on an aluminum post. Easy installation and adjustments make these guides a good choice to protect your investment. Shown with one pair installed on rear of lift.
