

Quality Time...

Quality Workmanship & Design.

Pier Pleasure invites you to take a look at our quality workmanship and design. Pier Pleasure goes the extra mile to meet or exceed your expectations. Extra effort is given to remove defects, sharp edges and corners. This ensures safety, maintains quality standards and assures your satisfaction. Pier Pleasure's standards for excellence demand high-quality components, such as non-corrosive stainless steel bolts, stainless cables, brass nuts, aluminum pulleys with brass sheaves and aluminum construction.

But it takes more than quality components to produce a quality product, it takes a team of dependable, dedicated people, all working together to make Pier Pleasure products and services what they are. We continually strive to exceed our customer's expectations and to ensure the customer's satisfaction with the product's performance. Without quality people, our products would just be another group of mediocre products found in today's marine market.

We believe the true value of a product can only be determined by the manufacturer's confidence in the product and when the customer's expectations of the product are satisfied by its performance.

Pier Pleasure will never sacrifice quality, performance, durability or customer satisfaction, just reduce the cost. After all, Pier Pleasure's name and reputation are on the line. We appreciate your consideration of Pier Pleasure for your lift and dock needs!

Sectional Dock System

Removable Deck Panels

Vinyl, Cedar and Aluminum dock surfaces have two 4' x 4' deck panels that are removable for easier installation and removal of dock sections.

Wood absorbs heat, but Brock Deck planks reflect the sun's rays. Stays cool to the touch.

The Brock Deck provides excellent resistance to stains and is easy to clean. Available in tan or gray.

Grooved design pattern provides a very stylish appearance, an excellent walking surface for shoes or bare feet and quick water drainage. It is slip resistant. Unlike treated wood, there are no toxic chemicals in Brock's decking, so it's safe for your family and pets. And it's 100% recyclable.

Vinyl Surface

4' x 4' Deck Panels
(2 per Dock Section)

Aluminum Surface

Extruded aluminum deck planks are painted with a baked-on enamel finish that has a light gray textured surface. The grooved design is attractive and assists with quick water drainage. The aluminum deck panels are durable and will last for many years.

4' x 4' Deck Panels
(2 per Dock Section)

Cedar Surface

Western Red cedar is used to maintain the quality and durability that customers have come to expect from Pier Pleasure. 5/4" x 6" planks are used to construct the removable panels. Enjoy the natural look of wood while having all the advantages of maintenance free aluminum construction and Pier Pleasure features.

Features and Benefits

Pier Pleasure's dock system offers many features and benefits not found in any other dock system. These unique features make them simple to install, level and remove.

Each dock section is designed to hold 80 lbs. of water in its 100% welded frame (Photo A). This feature adds stability during normal use and helps to hold the dock system in place during storms, high winds and wave action. Water is drained by removing the plugs under each section before removal in the fall. This is a great feature!

4' x 8' sections are connected end to end and side to side by Pier Pleasure's unique interlocking hinge. The first sections can form a ramp up or down allowing the dock system to adapt to any shoreline.

Pier Pleasure's dock legs are braced from side to side and front to back for maximum stability (Photo C). There are no leg posts above the dock surface and legs do not need to be removed, which makes installation, removal and storage easier. This also maintains a clean appearance.

Pier Pleasure's adjustable legs allow leveling from the top of the dock without entering the water (Photo D). Each leg levels independently and there are no set screws or holes to line up (Photo B). The leg adjustment mechanism has 18" of adjustment and carries a full lifetime warranty.

Height indicators on each leg make leveling easy and accurate. The indicators show you the distance from the top of the dock to the water. All bolts, pins and fasteners in the dock system are stainless steel which means no corrosion, no maintenance and long-term clean appearance.

Pier Pleasure's design flexibility allows unlimited layout options. Additional sections can easily be added later in any location to modify your layout as your needs change.

Pier Pleasure provides buyers the flexibility to design a layout that best fits their needs. An unlimited number of layouts can be created to meet any taste or desire. Design a slip for your boats or a large platform with plenty of room to share fun times with your family and friends. Whatever the case, get off the deck and make memories on your dock.

Sectional Dock System

Angled Dock Slip

The angled section allows you to create a simple slip for boat lifts when there is limited space.

8-ft Wide Dock with Wheel Chair Rails

If you have a special need, Pier Pleasure can help you design the dock that satisfies your requirements for your unique layout.

Step Section

The step section is an alternative choice to easily transition down to the desired height needed to start your dock.

Listening To Customers

Listening to your requests and designing a dock that meets your requirements is what Pier Pleasure is all about. The Pier Pleasure dock system allows you to design a dock that will succeed with any shoreline or dock layout you may require. If you have a distinctive layout or design request, Pier Pleasure will be pleased to assist you with your dock planning. Even if you want to purchase a simple straight out dock, you will feel like you purchased something exceptional.

Ideal For Limited Storage Space

Having limited space for storage can complicate storing sections. The sectional design of the Pier Pleasure system allows you to stack the frames and panels where there is limited space.

Large Platform

Pier Pleasure's dock sections can be easily configured to create a large platform. This will give you ample space for everyone to enjoy the dock without feeling crowded.

Dock Ramped Up

Pier Pleasure's hinge system allows you to form a ramp with your first dock section.

Dock Ramped Down

Placing dock sections on a shoreline with rocks and natural riprap can be challenging. Pier Pleasure's dock hinges allow for the flexibility to form a ramp over any obstacles on your shoreline.

Dock Installation

Installed & Removed Without Entering The Water

Carry the dock frame out onto the dock. 4' x 8' section frames with legs weigh 65 lbs.

Connect dock sections using Pier Pleasure's unique, interlocking hinges

Lower the section into the water with the use of a rope. No bolts, pins or tools are needed to connect dock sections.

Install panels into the dock frame.

Can Be Installed & Removed By One Person

Level section with the use of the adjustment crank. Level indicators on the side of each leg show you when you have reached your desired height.

Add water to the tubular frame for additional weight and stability.

Install dock accessories wherever you choose. Spaces between deck planks allow you to install accessories without the need to drill unsightly holes.

Dock Removal

After the accessories are removed and water is drained, remove dock frames with the optional tripod winch. Carry frames and stack on shore for storage.
